

PAVING

VF Support Pad

Joist Support Pad

Creating Cities
Where Urban Meets Nature

Our Innovation Your Solution

VF Support Pad is a fixed joist support for raised paving systems of minimal height. The elevated system allows for sufficient air circulation and improved drainage underneath pavers.

VF Support Pad

VF Support Pad is a fixed height joist support for raised paving systems. It accommodates environments with low height constraints whilst providing air circulation and drainage underneath pavers.

About VF Support Pad

VF Support Pads are connected to VersiFrame® joist substructure and restricts unintended movement during maintenance and everyday traffic.

VF Support Pads are used to elevate pavers to create leveled surfaces while ensuring water drains freely underneath the pavers.

VF Support Pads are also available in TPE, which has superior properties in noise reduction, shock absorption, and traction to prevent slipping on sloped surfaces.

VersiFrame® Accessories

1

Joist Spacer Tab

Joist Spacer Tab separates pavers by a gap of 3 mm, 4 mm, 8 mm and can be configured to accommodate different paver layouts.

2

Side Wall Spacer

Side Wall Spacer extends the end of a joist when it is a distance from the wall while ensuring a gap of 10 mm between pavers and the wall.

3

End Wall Spacer

End Wall Spacer covers the end of a joist when it is against the wall while ensuring a gap of 10 mm between pavers and the wall.

4

Perpendicular Joist Joiner

Perpendicular Joist Joiner allows one end of a joist to connect perpendicularly along the length of another joist.

5

Straight Joist Joiner

Straight Joist Joiner is a concealed joiner that connects 2 joists in a straight line.

6

End Restrainer

End restraint ensures that pavers do not slip off by closing off the perimeter edge of the paving area.

7

Angled Joist Joiner

Angled Joist Joiner is a stainless steel joiner that connects 2 joists in a straight line or at an angle.

8

VP Extender

VP Extender is used as a fixed base extender for an additional 4 mm height.

Technical Specifications

Material	PP/TPE
Height (mm)	4
Base diameter (m)	165
Design span distance for joist support (mm)	400 - 600
Biological / Chemical resistance	Unaffected by moulds and algae. Resistant to corrosion

Advantages

- 1 Protects underlying surface
- 2 Facilitates rapid drainage and air circulation
- 3 Quick and easy installation
- 4 Cost-effective system for raised paving
- 5 Reduces sound and vibration transmission

The Elmich security hologram ensures authenticity of the products.
